WORK EXPERIENCE

Purple

Nov 2025 - Present

Sales Supervisor

Rancho Cucamonga, CA

- Developed an Excel Solver linear optimization model that supported workforce scheduling decisions by generating cost-efficient schedules while maintaining staffing coverage and operational requirements.
- Analyze KPI performance using Storeforce to establish daily, weekly, and monthly sales targets, supporting inventory planning and helping the store consistently achieve performance objectives.
- Manage inventory and track inbound shipments in Oracle NetSuite ERP to support replenishment decisions, maintain inventory accuracy, and ensure product availability.
- Coach and develop team members through performance feedback and real-time training, helping the store consistently achieve monthly LY benchmarks and quarterly stretch goals.
- Collaborate with district leadership to implement operational initiatives and execute sales strategies that supported store performance objectives.

Owens and Minor

Sep 2024 - Oct 2025

Warehouse Lead

Ontario, CA

- Led warehouse order fulfillment by coordinating workflow and labor assignments, ensuring accurate and timely order processing while maintaining productivity and safety standards.
- Trained and mentored warehouse associates on picking procedures, inventory handling, and safety protocols to ensure operational consistency, regulatory compliance, and efficient order fulfillment.

Red Lobster

Oct 2019 - Aug 2023

Supervisor

Ontario, CA

- Led shift operations in a busy restaurant, directing team members and adjusting staffing to ensure smooth service flow, resulting in consistently high guest satisfaction scores.
- Supported restaurant operations by filling critical staffing gaps and coaching team members, helping maintain service standards and operational continuity during peak business periods.

EDUCATION

Master of Science, Digital Supply Chain Management

May 2028

California State Polytechnic University, Pomona

Pomona, CA

- **Coursework:** Optimization Models, Purchasing Management and Strategic Sourcing, Global Logistics and Transportation, Negotiation and Persuasion in Supply Chain

Bachelor of Science, Business Administration

Dec 2023

California State Polytechnic University, Pomona

Pomona, CA

PROJECTS

Supply Chain Production Optimization Model

Optimization Models – Graduate Project

Cal Poly Pomona

- Developed a 30-day linear optimization model in Excel Solver that optimized production and order quantities across internal supply, outside-union procurement, and recombined milk while balancing forecasted demand, inventory availability, operational constraints, and sourcing costs.
- Generated a profit-maximizing supply plan by optimizing order quantities and resource allocation, fulfilling 8.96 million liters of demand with zero shortages while maximizing modeled profitability.

SAP ERP Warehouse and Order Fulfillment Simulation

Graduate Project

Cal Poly Pomona

- Executed an end-to-end SAP ERP order fulfillment process, including sales order creation, inventory verification, outbound delivery processing, warehouse transfer orders, goods issue, and inventory reconciliation across Sales and Distribution (SD) and Warehouse Management (WM).
- Applied SAP ERP to validate inventory availability, execute warehouse transactions, and maintain inventory accuracy throughout the fulfillment process while supporting efficient warehouse operations.

TECHNICAL SKILLS

- **Skills:** SAP ERP (WM, MM), NetSuite, Storeforce, Endear, Microsoft Excel, Inventory Management, Shipment Tracking, Replenishment, KPI Analysis, Supply Chain Operations
- **Languages:** English (Native), Japanese (Conversational)
