WORK EXPERIENCE

Purple

Sales Supervisor

Nov 2025 - Present

Rancho Cucamonga, CA

- Developed an Excel Solver linear optimization model to improve workforce scheduling, balancing staffing coverage and operational requirements while reducing modeled weekly payroll hours from 150 to 92, a 39% reduction.
- Analyze KPI performance in Storeforce to establish daily, weekly, and monthly sales targets, supporting inventory planning while helping the store remain profitable and consistently exceed LY performance since joining.
- Manage approximately 30 SKUs and track inbound shipments through Oracle NetSuite ERP to support replenishment decisions, maintain inventory accuracy, and ensure product availability.
- Coach and develop a 5-person team through performance feedback and real-time training, contributing to consistent achievement of monthly LY benchmarks and quarterly stretch goals.
- Collaborate with district leadership on weekly operational initiatives and sales strategies, supporting execution of store performance objectives and changing business priorities.

Owens and Minor

Warehouse Lead

Sep 2024 - Oct 2025

Ontario, CA

- Led approximately 15 warehouse associates processing roughly 6,000 picks per day, coordinating workflow and labor assignments throughout the shift while using Excel to track performance and support productivity, accuracy, and safety targets.
- Trained and mentored 10 warehouse associates on picking procedures, inventory handling, and safety protocols, supporting operational consistency and efficient order fulfillment.

Red Lobster

Supervisor

Oct 2019 - Aug 2023

Ontario, CA

- Led an average team of 10 employees during high-volume shifts, directing workflow and adjusting staffing based on operational needs to maintain smooth service flow and strong guest satisfaction.
- Cross-trained across all front-of-house roles and filled critical staffing gaps during peak periods, helping maintain service continuity while coaching team members across multiple positions.

EDUCATION

Master of Science, Digital Supply Chain Management

California State Polytechnic University, Pomona

May 2028

Pomona, CA

- **Coursework:** Optimization Models, Purchasing Management and Strategic Sourcing, Global Logistics and Transportation, Negotiation and Persuasion in Supply Chain

Bachelor of Science, Business Administration

California State Polytechnic University, Pomona

Dec 2023

Pomona, CA

PROJECTS

Supply Chain Production Optimization Model

Optimization Models – Graduate Project

Cal Poly Pomona

- Developed a 30-day linear optimization model in Excel Solver that optimized production and order quantities across internal supply, outside-union procurement, and recombined milk while balancing forecasted demand, inventory availability, operational constraints, and sourcing costs.
- Generated a profit-maximizing supply plan by optimizing order quantities and resource allocation, fulfilling 8.96 million liters of demand with zero shortages while maximizing modeled profitability.

SAP ERP Warehouse and Order Fulfillment Simulation

Graduate Project

Cal Poly Pomona

- Executed an end-to-end SAP ERP order fulfillment process, including sales order creation, inventory verification, outbound delivery processing, warehouse transfer orders, goods issue, and inventory reconciliation across Sales and Distribution (SD) and Warehouse Management (WM).
- Applied SAP ERP to validate inventory availability, execute warehouse transactions, and maintain inventory accuracy throughout the fulfillment process while supporting efficient warehouse operations.

TECHNICAL SKILLS

- **Skills:** SAP ERP (WM, MM), NetSuite, Storeforce, Endear, Microsoft Excel, Inventory Management, Shipment Tracking, Replenishment, KPI Analysis, Supply Chain Operations
- **Languages:** English (Native), Japanese (Conversational)
